SkillSet

1. 重要的放左边
2. 完全不熟悉的，或者知道他很过时，可以删掉，原则：能保留的尽量保留

3. Check "Environment" after each project. It should have all the highlighted terms from the responsibilities. Delete the terms which are not mentioned under responsibilities. Add the ones which are missing.
4. Check and adjust the technical skill set box as per your skill sets.

Project Description

- It is a paragraph with 4 lines
- No bold words
- Recent project is the most important, you should prepare way better than other projects.
- It is a story to show what kind of features you did. Also you can slightly add the technical skills. How:
 1. ChatGPT (尽量多给点细节和要求, small scope)
 2. LinkedIn 找这个公司的人, 看他的主页有没有介绍
 3. Job description
 4. Examples
 - * Onboarding
 - * Internal tools
 - * AT&T: device management
 - * Order, payments
 - * Ads
 - * Shipping
 - * Cart

Resume Prepare Notes from Charles

Resume Update Tips

- Project section to demonstrate your personality and skills, and be the talking point during the interview
 - * Ideally, 1-2 lines about the project, 2-3 lines about your role, what technologies you used, what you did, your learning, etc.
 - * Ideally, 2 to 3 projects that align with your interests/position you are applying for
- From Google
 - * Skipping the objective. (They know what your objective is: to land this particular job.)
 - * Using black text, and keep the font and size clean, simple, and consistent.
 - * Checking for typos. This is so important, we'll say it again: Check for typos.
 - * You should write a new, tailored resume for every position you apply for.
 - * Use the X Y Z formula: Accomplished [X] as measured by [Y], by doing [Z].
 - * Focus on accomplishments -- quantitative results and the impact that you had as a result.
 - * E.g.
 - * OK: "Won second place in a hackathon."
 - * Better: "Won second place out of 50 teams in the hackathon."
 - * Best: "Won second place out of 50 teams in hackathon at NJ Tech by working with two colleagues to develop an app that synchronizes mobile calendars."
